

As a market leader, **ENERGI Fenestration Solutions** is committed to a responsible use of natural resources and sustainability.

ENERGI

ZERO WASTE SOLUTIONS

Under an approach aimed at continuous improvement, our processes are designed and planned to respect the environment and principles of sustainable development of materials. Furthermore, we promote strict environmental practices by using resources as efficiently as possible.

We promote responsible consumption, recycling and reduction of resources used, among our employees.

RECYCLE DON'T THROW AWAY

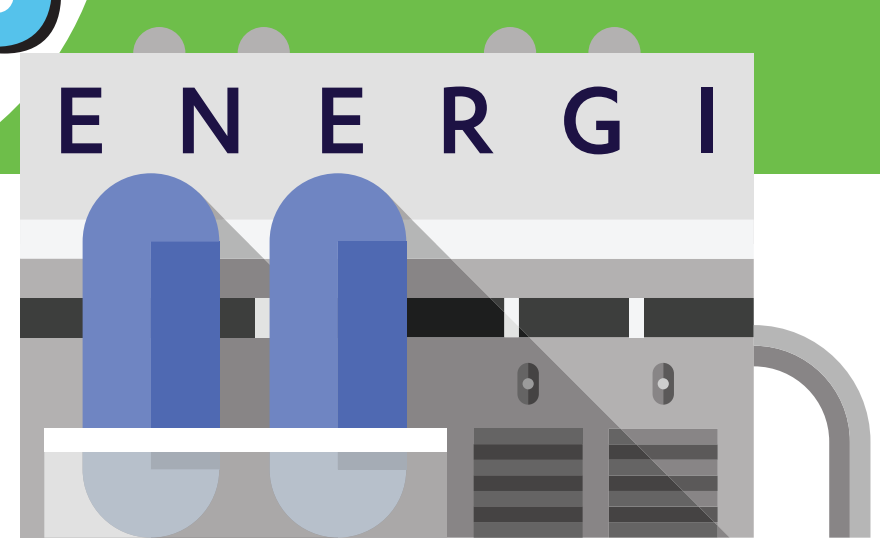

IS 100% RECYCLABLE

PROFILE PRODUCTION GENERATES WASTE AS DOES ANY INDUSTRIAL PROCESS. RECYCLING SUCH WASTE IS OUR RESPONSIBILITY.

THE AVERAGE WINDOW & DOOR MANUFACTURER THROWS AWAY

80%

OF ITS PVC PURCHASES

92%

OF YOUR PVC PURCHASES IS USED IN THE MANUFACTURING OF WINDOWS AND DOORS WITH THE OBJECTIVE OF REDUCING THE ENERGY CONSUMPTION OF A HOUSE.

SEGREGATION OF PVC WASTE

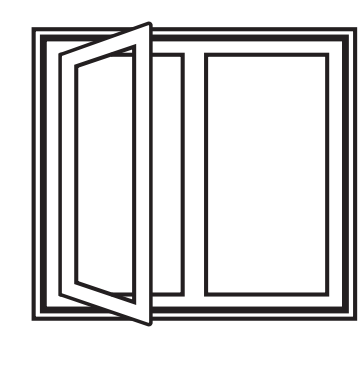

THERE ARE TWO TYPES OF END CUT QUALITY.

① Rigid white, with or without white coextrusion.

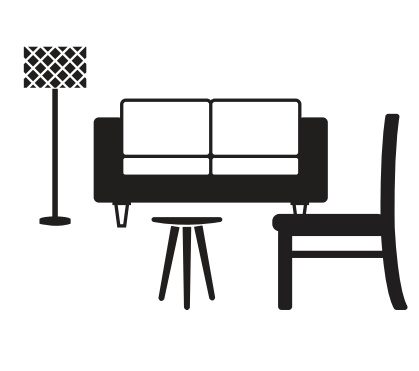

QUALITY 1

Generally, **58%** is **QUALITY 1** and can be reused in the production of PVC window profiles

QUALITY 2

42% is **QUALITY 2** and can be reused in the manufacture of a multitude of other products

② Rigid white with black coextrusion and/or rigid in any colour with or without coextrusion.

② End cuts with contaminants (sealing materials, Weather-stripping, metal, etc.) ENERGI or non ENERGI PVC.

IN A WORLD FACED WITH THE DEPLETION OF NATURAL RESOURCES, RECYCLING IS A CRITICAL ISSUE.

Our **PVC** recovery and recycling program is one of the ways in which we are trying to reduce our ecological footprint.

Fast Facts

The PVC environmental balance sheet reveals that this raw material enjoys a number of recognized environmental qualities, including strength, easy maintenance and good energy efficiency.

PVC windows and doors are built to last for future generations. This makes them an ideal choice for manufacturing window and door products. PVC products are also energy efficient, reducing energy consumption.

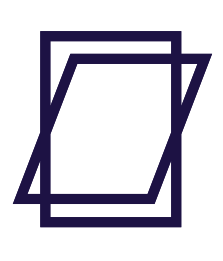

PVC IS 100% RECYCLABLE.

Our goal is to recover 100% of manufacturing waste.

Your customers are aware of the need to go « green » and our high-energy efficiency PVC windows and doors correspond with their belief in a better world.
